EDUCATION

B.Sc. in Software Engineering
4th Year Student
2023 – Present
Student at Injibara University

TECHNICAL SKILLS

Languages:

JavaScript | C++ | PHP

Frontend:

HTML5 | CSS3 | Tailwind CSS | Responsive Design | React | Next.js

Backend & DB:

Node.js | Express.js | REST API | MySQL

Tools & Platforms:

Git | GitHub | VS Code | Postman

LANGUAGES

- **Amharic:** Native / Fluent
- **English:** Professional Working

TEWACHEW MELAKU

SOFTWARE ENGINEERING STUDENT (4TH YEAR)

PROFESSIONAL SUMMARY

Motivated 4th-year Software Engineering student at Injibara University specializing in full-stack web development with React, Node.js, Express and MySQL. Has designed and built six web applications, from responsive interfaces to REST APIs and relational databases, and uses Git and Postman in day-to-day development. Seeking an internship to apply these skills on real-world products and keep growing as an engineer.

KEY SOFTWARE PROJECTS

Smart Blog System

React • Tailwind CSS • Node.js

Full-stack blogging platform for writing, publishing and reading posts.

- Built a responsive React interface styled with Tailwind CSS.
- Developed the Node.js back end that serves blog content to the client.

Global Sentiment Tracker

React • Tailwind CSS • Node.js

Web application that tracks and presents public sentiment across the world.

- Created a clear, responsive dashboard in React and Tailwind CSS.
- Implemented the Node.js server that supplies sentiment data.

Smart Agriculture Management System

React • Node.js • Express • MySQL

Full-stack web application engineered for intelligent monitoring and operational management of agricultural analytics.

- Architected RESTful endpoints using Express and Node.js for real-time data handling.
- Designed normalized relational database schemas in MySQL to store sensor and resource records.
- Developed reactive UI components in React for responsive metrics display.

Restaurant Management System

React • Node.js • Express • MySQL

End-to-end management system streamlining order management, floor operations, and transactional logging.

- Built CRUD API endpoints using Express to facilitate ordering and table reservation workflows.
- Integrated frontend state management with backend MySQL database queries.

Hospital Management System

React • Node.js • Express • MySQL

Hospital management platform covering patient records, appointments, wards, billing, pharmacy and laboratory.

- Built a dashboard showing patients, admissions, bed occupancy and available doctors.
- Developed modules for appointments, billing, pharmacy and laboratory.

Personal Expense Tracker

React • Tailwind CSS • JavaScript

Financial tracking web tool for recording and visualizing personal budgets.

- Designed a responsive, mobile-first interface using Tailwind CSS utility classes.

CORE COMPETENCIES

Full-Stack Development | RESTful API Design | Relational Database Design | Responsive UI/UX | Version Control (Git) | System Debugging
